

Errata:

3rd edition printing Vertical Loads errata:

Vertical Problem #9 – The pullout resistance factor $\phi = 0.9$ for steel reinforcement at MSE walls was contained in Table 11.5.7-1 in previous editions of AASHTO. However, it was removed from this table in the 8th edition, and it is not listed in the Changed or Deleted Articles for this AASHTO edition.

Additionally, no reasoning could be found regarding its removal. However, it is my understanding that this resistance factor has been put back into the table in AASHTO 9th edition.
